

BEYNON[®]
A Tarkett Sports Company

1-COMPONENT POLYURETHANE BINDER PRODUCTS

INNOVATIVE SOLUTIONS FOR RESILIENT SURFACING

Beynon's 1-component polyurethane binder products are trusted by professionals worldwide for their **superior performance, durability, and versatility** across a wide range of applications. Designed to meet the demands of diverse climates and environments, our binders are available in tailored formulations to suit specific project needs. Manufactured under **ISO 9001:2015-certified** Quality Management System and **ISO 14001:2015-certified** Environmental Management System (EMS), Beynon binders deliver unmatched reliability, sustainability, and long-term value.

AROMATIC POLYURETHANE BINDERS

Strength and Value for Specialized Applications

BEYPUR[™] aromatic binders are designed to deliver **excellent bonding strength and cost-effective solutions**, making them ideal for high-performance surfaces like running tracks. These binders offer extended open cure times to accommodate large-scale or complex installations in varying climates. Their robust adhesive properties ensure excellent resilience and durability for long-term use. Whether you're working in hot, humid environments or temperate regions, BEYPUR[™] aromatic binders are tailored to meet your specific needs.

Product Name	Key Features	Typical Applications
BEYPUR[™] 300 MDI/TDI Binder	Very long open cure time for large-scale applications in hot, humid climates.	Running tracks
BEYPUR[™] 320 MDI Binder	Long open cure time for flexible applications in moderate climates.	Running tracks, poured-in-place playgrounds, tiles, molded parts
BEYPUR[™] 320-Bio MDI Binder	Biobased version of our Beypur 320 with long open cure time for flexible applications in moderate climates.	Running tracks, poured-in-place playgrounds, tiles, molded parts

ALIPHATIC POLYURETHANE BINDERS

UV Stability and Durability for Outdoor Applications

BEYPUR™ aliphatic binders are crafted for projects requiring **exceptional UV resistance, non-yellowing properties, and durability in outdoor environments**. Perfect for sunlight-exposed surfaces, these binders ensure long-lasting performance, aesthetic appeal, and chlorine resistance for waterplay areas. With tailored formulations offering low- or high-viscosity options and varying cure times, BEYPUR™ aliphatic binders provide the ultimate flexibility to meet diverse project demands.

Product Name	Key Features	Typical Applications
BEYPUR™ 340	UV-stable, moderate cure time for general-purpose.	Poured-in-place playgrounds, tiles, molded parts
BEYPUR™ 340-Bio	Biobased version of our Beypur 340 with moderate cure time for general-purpose.	Poured-in-place playgrounds, tiles, molded parts
BEYPUR™ 340-LV	Low-viscosity formula optimized for cooler climates.	Poured-in-place playgrounds
BEYPUR™ 340-HT	High-viscosity formula with slow cure time, ideal for hot climates.	Poured-in-place playgrounds
BEYPUR™ 345	Fast cure time for time-sensitive installations.	Poured-in-place playgrounds, tiles, molded parts
BEYPUR™ 360	Chlorine-resistant binder with moderate cure time.	Waterplay Areas, Splash Pads, Pool Decks
BEYPUR™ 360-SC	Slow-cure formula with superior chlorine resistance.	Waterplay Areas, Splash Pads, Pool Decks
BEYPUR™ 360-HV	High-viscosity, chlorine-resistant formula with moderate cure time.	Waterplay Areas, Splash Pads, Pool Decks

CUSTOM REQUESTS

- **AM – Enhanced Anti-Microbial Version** of each of the binder products are also available.
- **Custom formulations and private labeling** are available upon request.
