

# RETENTION COAT TEXTURE

Our Retention Coat texture helps add an additional layer of protection to your running track surface.

The Retention Coat is installed by applying two applications of an aliphatic pigmented polyurethane coating to the surface, helping lock the EPDM granules in place, limiting migration, and delivers increased color retention, durability, and stain resistance.

**Beypur 160**  
(Aliphatic Pigmented  
Polyurethane Coating)

## THE BENEFITS

**INCREASED  
COLOR STABILITY**

**5X LESS GRANULE  
MIGRATION**

VS STANDARD EMBEDDED TEXTURE

**40% INCREASED  
WEAR RESISTANCE**

VS STANDARD EMBEDDED TEXTURE

**INCREASED  
STAIN RESISTANCE**

**EASY  
MAINTENANCE**

**MEETS WORLD ATHLETICS  
COEFFICIENT OF FRICTION  
REQUIREMENTS**

**ADDITIONAL 2-YEAR  
WARRANTY\* FOR COLOR**

\* Warranty terms may vary based on project specifications.
