

RESURFACING

REENERGEIZE YOUR TRACK

Replacing your track & field surface has never been so easy and smart! Beynon's Resurfacing application can restore the appearance, texture and performance of your existing surface. Not only does it improve aesthetics, but it can bring aged rubber sheet good products and two-component polyurethane systems back to within IAAF performance parameters. **Beynon Resurfacing helps simplify the process, repurposes your existing track, and helps reduce costs. A true win, win, win.**

BUILD ON YOUR INVESTMENT

You invested a significant amount in your initial track surface, so why throw away the investment? The surface might appear worn, but that's aesthetics. Your surface can accept a new layer to bring back its former beauty and performance. Our application helps repurpose your track and reduce costs for your program. **Don't work harder, work smarter.**

WHY BEYNON

WE ARE DESIGN & CONSTRUCTION EXPERTS

With over 30 factory trained installation crews worldwide, three Certified Track Builders on staff, in-house IAAF testing, as well as a team of designers, Beynon has one of the most experienced and knowledgeable teams in the industry.

THIS ISN'T OUR FIRST RESURFACING PROJECT

With over 4,000 installations in North America in the last 10 years, we have experience resurfacing a variety of track products in a wide range of climates. This isn't our first rodeo.

WE MAKE IT EASY FOR YOU

Through Beynon financial, we make it easy for you to get your dream surface. Offering a variety of cooperative purchasing programs and financing, it's never been so simple.

WE STAND BEHIND OUR WORK

Because our founder's name stands behind each track that we install, our dedication to excellence is unmatched. This dedication leads us to offer the longest and most comprehensive insured warranties in the industry, so you can rest easy.

YOUR PROJECT DOESN'T LEAVE OUR HANDS

Beynon controls all aspects of the manufacturing chain, which allows us to create the right product, regardless of the facility. From start to finish, your project doesn't leave our hands. One contact, one team, one company. Every Beynon track is manufactured in our ISO 9001 certified headquarters in Hunt Valley, Maryland, USA.

WE ARE FINANCIALLY STABLE

Part of Tarkett Sports, a division of the Tarkett Group, a worldwide leader of innovative flooring and sports surface solutions, Beynon has unprecedented financial support and stability. Partner with a company you can trust for years to come.

An aerial photograph of a large outdoor sports stadium. The stadium features a red running track with white lane markings, a green grassy field in the center, and a blue area on the left side of the field. The seating area is visible on the right side of the track. The stadium is surrounded by green grass and trees. In the background, there are some buildings and a parking lot. A large red banner with white text is overlaid on the left side of the image.

HOW IT WORKS

1

SURFACE INSPECTION

Beynon performs a comprehensive analysis of the existing conditions of your surface including planarity and adhesion. For projects utilizing a full-pour system, an IAAF Force Reduction test is performed. Based on the results, our team of experts can recommend a range of options to ensure the surface meets IAAF performance standards.

2

PRIMER & LEVELING LAYER

Once the specific system and desired surface texture are determined, Beynon thoroughly cleans the existing surface and applies a coat of our proprietary polyurethane priming system. Depending on the thickness desired, a leveling layer is then applied – providing a receiving surface that is chemically bonded with the proper planarity. An optional force reduction cushioning layer is available to increase shock absorption properties.

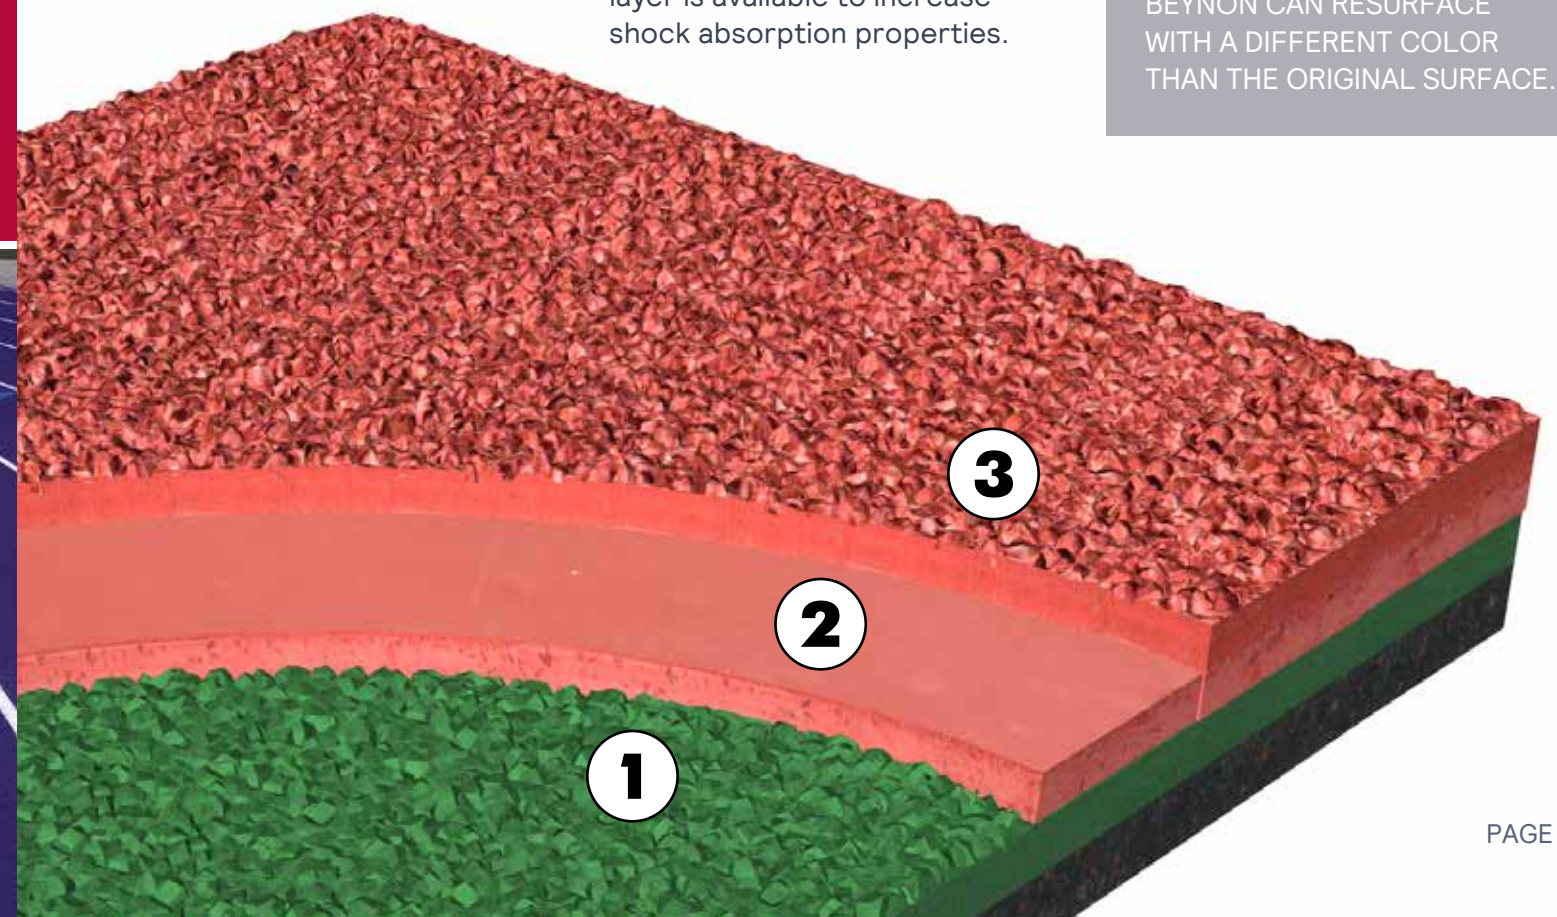

3

WEAR LAYER

A textured wear coat is then applied to the leveling layer to correct or improve resiliency and feeling under foot. The application can be finished with Beynon's Embedded, Encapsulated or Hobart texture.

DID YOU KNOW?

BEYNON CAN RESURFACE WITH A DIFFERENT COLOR THAN THE ORIGINAL SURFACE.
