

ADDED PROTECTION FOR YOUR SURFACE

HOBART TEXTURE & RETENTION COAT TEXTURE COMPARED TO EMBEDDED TEXTURE

This guide will help showcase the key advantages and differences between our Hobart™ texture and Retention Coat texture, which are available on all of Beynon Sports' Intermediate Series and Performance Series systems. Both textures offer leading results, proven in the lab and on the track. Protect your running track surface to get the most out of your investment.

BENEFIT	HOBART TEXTURE VS EMBEDDED TEXTURE	RETENTION COAT TEXTURE VS EMBEDDED TEXTURE
Improved Surface Durability	15 times Less granule migration	5 times Less granule migration
Improved Wear Resistance	466% Increased wear resistance	40% Increased wear resistance
Improved Color Retention Over Extended Periods	Enhanced protection against ultraviolet radiation (UV) due to aliphatic polyurethane protective coating	Enhanced protection against ultraviolet radiation (UV) due to aliphatic polyurethane protective coating
Reduced Maintenance	Increased stain resistance thanks to the added surface coating	Increased stain resistance thanks to the added surface coating
Extended System Warranty	Additional 5-year warranty* for color	Additional 2-year warranty* for color

*Warranty terms may vary based on project specifications.
